## *Where Wonder Meets Rigor*

---

Wonder is the faculty of the human spirit by which we lie open to the greatness of the world we live in. Rigor is grounded on specificity and tenacity, which together allow one to read more closely, more slowly, and with more curiosity. It is the conviction of our pedagogy that wonder craves rigor and rigor feeds wonder. This controls everything about how we teach: we build our classes on the highest standards, but also on *joy*.
